

## EHCC's BPI-Accredited Continuing Education Courses

BPI requires recertification every three years. Technicians have three options for recertification:

- Complete and submit 30 hours of qualified continuing education and pass a field examination only for each designation
- Complete and submit 10 - 29 hours of qualified continuing education and pass a 50 question written examination and field examination for each designation
- Complete and submit less than 10 hours of qualified continuing education and successfully pass a 100 question written exam as well as a field exam for each designation

When you attend a BPI-recognized class, make sure you sign the BPI CEU sign in sheet and fill in your candidate ID number on the sheet. BPI cannot track your continuing education credits without this information.

Course Name	Units
